## Discontinuous Bins Wet Dumper Mod. DWBD\_150 & DWBD\_200

Suitable for gentle unloading of Bins with apples in water

### Technical Features:

- Full Stainless Steel construction
- Process in three station: Full Bins Feeding, Immersion Station, Empty Bins Exit
- Floating device for automatic water feeding and level adjusting
- Motor-driven Pump for water recirculation
- Special model for pears unloading in water
- Water Buffering channels
- Semi-Automatic (Mod. 150) or Fully Automatic operation (Mod. 200)
- Capacity: 20 - 40 Bins / Hour

## Continuous Crate Wet Dumper Mod. CWD\_100 & Mod. CWD\_200

Suitable for gentle unloading of crates with apples in water

### Technical Features:

- Full Stainless Steel construction
- Motorized conveyor for crates immersion (2 conveyors on Mod. 200)
- Floating device for automatic water feeding and level adjusting
- Motor-driven Pump for water recirculation
- Special model for pears unloading in water
- Water Buffering channels
- Capacity  
Up to 400 Boxes/ Hour (Mod.100)  
Up to 800 Boxes/ Hour (Mod.200)

## Roller Inspection Table

### Technical Features:

- Full Stainless Steel construction
- Series of PVC rollers with rotating system for optical selection of products
- Platforms, Stairs and Top Lighting System
- B & C grade conveyer exit belts
- Electronically adjustable speed control with Inverter

## Washing/Brushing/Polishing Unit

### Technical Features:

- Stainless steel internal parts & components
- Series of brushes for washing & brushing of products
- Series of nozzles to sprinkle fresh water on the fruits (Optional: Dosing Pump for spraying cleanser/detergent)
- Series of rollers with donuts sponges for pre-drying
- Series of natural soft hair brushes for polishing or waxing
- Air Fans on the top of the machine for pre-drying
- Electronically adjustable speed control with Inverter

## Indicating Apples Processing Line
